Vercel
Confluence
Jira

CERTIFICATIONS

NN/g Certificate in UX
Specialty: Interaction Design
UXC# 1084270 · Awarded 2024

EDUCATION

B.S. Human Computer Interaction
NJIT Ying Wu College of Computing
2021 – 2023

Certificate, UX/UI Design
Thinkful
Jan 2022 – May 2022

A.S. Digital Communication & Media
County College of Morris
2019 – 2021

LEADERSHIP

Chubb Aspiring Management Program
Co-op Interview Lead
Design Co-op Mentor

Work History

Oct 2022 – Present

User Experience Designer

Chubb, Global Insurance

Own digital consumer proposition development at Chubb across two dimensions: understanding what consumers need in the market, and understanding what the company is trying to sell. My role is connecting those two things. I use UX process to create the artifacts that make that connection legible, and then drive execution projects that bring it to life.

- Pioneer agentic design workflows at Chubb using Claude Code and MCP tooling, building and deploying functional prototypes in days rather than weeks and establishing a new standard for how early-stage propositions are validated
- Streamline agentic prompting practices across the design organization, developing repeatable workflows and sharing frameworks that help teams integrate AI-assisted tooling into their day-to-day design process
- Own end-to-end D2C proposition development across consumer insurance products including renters, Valuable Articles Coverage, travel, and marketplace quoting, from consumer needs research through to shipped experience
- Use journey mapping and service blueprinting to surface the gap between consumer expectations and company offerings, producing shared artifacts that give product, engineering, marketing, and actuarial teams a common view to build from
- Conduct large-scale UX research across North America, Austria, Philippines, Mexico, and EMEA to ground proposition decisions in real consumer behavior
- Produce AI-generated promotional videos to drive UX awareness and adoption across the company, making design process and outcomes more visible and compelling to non-design stakeholders

Apr 2017 – Sep 2022

Freelance UX/UI Designer

Self-Employed · New York City Metropolitan Area

- Delivered an 8-month paid contract to design and launch a full website for an acupuncture business owner, building on Squarespace with custom code injection to extend platform functionality beyond its native capabilities
- Designed and launched a website for an independent yoga instructor, creating a digital presence to support client acquisition and class scheduling
- Partnered with small business owners to translate brand and service needs into clear, functional digital experiences across web and mobile platforms

Dec 2014 – Present

Yoga Instructor

Lifetime Fitness

- Expanded role beyond teaching into program leadership, selected for advanced training with master teacher Jonny Kest in Michigan, which certified and equipped me to lead 200-hour Yoga Teacher Training programs
- Led 15 yoga teacher training programs with an average of 12 students per cohort, certifying roughly 180 students in alignment with Yoga Alliance credentialing standards
- Taught 15+ classes per week while maintaining an 85% class retention rate, building a loyal student base through consistent, high-quality instruction
- Led empathy workshops, hosted community events, and organized charity initiatives including fundraising campaigns for autism awareness

Areas of Expertise

UX & Proposition Design: Journey Mapping | Service Blueprinting | Consumer Needs Research | D2C Product Design | Information Architecture | Usability Testing | Stakeholder Alignment

Agentic & Technical Stack: Claude Code (MCP) | Agentic Prototyping | HTML & CSS | Git & GitHub | Squarespace (Code Injection) | Surge | Vercel | VS Code

Research & Strategy: Mixed-Methods Research | Proposition Frameworks | Cross-Functional Facilitation | Workshop Design | Global Consumer Insights | Service Design
